*Letters in Mathematical Physics* **68**: 195–196, 2004.

# Contents of Volume 68 (2004)

**Volume 68 No. 1 April 2004**

JOSÉ A. VALLEJO / Generating Operators of the Krasil'shchik–Schouten Bracket 1–17

MILÁN MOSONYI and DÉNES PETZ / Structure of Sufficient Quantum Coarse-Grainings 19–30

PAVOL ŠEVERA / Noncommutative Differential Forms and Quantization of the Odd Symplectic Category 31–39

JØRGEN RASMUSSEN / Stochastic Evolutions in Superspace and Superconformal Field Theory 41–52

GEOFFREY L. SEWELL / Quantum Macrostatistical Picture of Nonequilibrium Steady States 53–65

**Volume 68 No. 2 May 2004**

P. GILKEY, K. KIRSTEN and J. H. PARK / Heat Content Asymptotics for Operators of Laplace Type with Spectral Boundary Conditions 67–76

PIERRE GAILLARD / A New Family of Deformations of Darboux–Pöschl–Teller Potentials 77–90

TAMAS VARGA / Generalized Verlinde Formulae for Some Riemann Surface Automorphisms 91–102

MICHAEL HARTMANN, GÜNTER MAHLER and ORTWIN HESS / Gaussian Quantum Fluctuations in Interacting Many Particle Systems 103–112

ALAN CAREY and HENDRIK GRUNDLING / On the Problem of the Amenability of the Gauge Group 113–120

JOAKIM ARNLIND and JENS HOPPE / Eigenvalue-Dynamics off the Calogero–Moser System 121–129

**Volume 68 No. 3 June 2004**

V. BENTKUS and V. PAULAUSKAS / Optimal Error Estimates in Operator-Norm Approximations of Semigroups 131–138

N. S. WITTE / Gap Probabilities for Double Intervals in Hermitian Random Matrix Ensembles as τ-Functions – Spectrum Singularity Case 139–149

ROBIN ENDELMAN and TIMOTHY J. HODGES / Degenerations and Representations of Twisted Shibukawa–Ueno $R$-Operators 151–164

MICHAEL BAAKE and BERND SING / Diffraction Spectrum of Lattice Gas Models above $T_c$ 165–173

GLENN BARNICH, SERGE LECLERCQ and PHILIPPE SPINDEL / Classification of Surface Charges for a Spin 2 Field on a Curved Background Solution 175–181

YURI KOZITSKY / On a Theorem of Høegh-Krohn 183–193
